PLEASE NOTE: All dogs, cats and ferrets are at risk of being infected by heartworms and must receive monthly protection. Please ask us for information to protect your pets from this deadly disease transmitted by an otherwise harmless appearing mosquito bite!

Welcome to our hospital. Please understand that all animals being admitted to our clinic are required to be current on all vaccinations and be free of all internal parasites such as worms and external parasites such as fleas, ticks and ear mites. If we are not satisfied that any pet meets such health requirements, we will be testing and treating for all parasites for the protection of your pets as well as others at our hospital. Please sign your name here to acknowledge this requirement and accept financial responsibility for your pet.
