Consent For Surgery/Anesthetic Procedure

Your pet's safety and comfort are of utmost importance at All Pets Hospital. Before your pet undergoes surgery, he/she will be examined for any issues that could potentially interfere with anesthesia. Your pet will be monitored before, during, and after surgery by qualified staff to help ensure a safe, quick procedure and recovery. We are happy to report that our patients do very well and we expect today to go smoothly.

For our mature patients (over 6 years of age) and for any pets that have chronic health problems, we require more extensive medical tests to evaluate the safety of anesthetics and surgery. A Doctor or Certified Veterinary Technician will discuss this with you. Sometimes medications or the procedure itself must be modified to make it safer for the pet based on this testing. On rare occasions, we will elect to postpone a procedure until a medical issue is brought under control or resolved.

Even for our younger, healthy patients, pre-anesthetic blood work can help put your mind at ease. In some instances, this blood work will detect an underlying medical issue that may not have been previously known.

While performance of these tests help decrease anesthetic and surgical risk, it cannot detect all potential health problems or eliminate all risk.

PLEASE PERFORM PRE-ANESTHETIC TESTING YES NO
 (blood work is MANDATORY every 6 months for pets over 6 years) under 6 years \$85.00
 over 6 years \$110.00

Every pet admitted to All Pets Hospital MUST be current on Rabies, DALPP/RCP, and Bordetella. Dogs over 6 months must have a negative heart worm test within the past year.

Due to the fact that we cannot control the flea and tick population outdoors, we HIGHLY recommend your pet be current on flea/tick preventative. In the event fleas and/or ticks are found on your pet, they will be treated at the owner's expense with an appropriate prescription(s). _____ (initial)

Consider micro-chipping your pet! A microchip is a permanent form of identification that links your pet to YOU in the case of your pet wandering, getting lost, or some other emergency.

Sedation is not necessary for the implant, but we offer it while the animal is under anesthesia in order to reduce stress, and minimize the discomfort of the patient.

PLEASE IMPLANT A HOME AGAIN MICROCHIP , AND REGISTER MY PET FOR ME \$60.00 YES NO

DNR

In the event of a medical emergency with my pet while in the care of All Pets Hospital, LTD -

I DO NOT wish any measures be taken to resuscitate my pet **(DNR)** _____ (initial)
